PROFILE PLAYBOOK · 2026

LINKEDIN PLAYBOOK

A step-by-step plan to turn your LinkedIn profile into a hiring page — including exactly how to add live project links that people can click.

Prepared for	Profile	Portfolio	Date
Muhammad Kashif	in/muhammadkashif-mtkcodex	pf.mtkcodex.site	8 November 2026

01 The five-second audit

What a founder sees before they scroll, and what it is costing you.

A visitor decides in about five seconds whether you are worth a click. Right now your profile tells them you are a *Full Stack Engineer who develops CRM systems* — a job title. It does not tell them you have shipped seven production platforms, three of which are live on the internet with real users. That is the gap this document closes.

PROBLEM	WHY IT COSTS YOU WORK	FIX
Name mismatch	LinkedIn says *Malik Kashif*; your portfolio, CV and GitHub say *Muhammad Kashif*. Splits your search identity.	Use one name everywhere
Weak headline	Describes a task, not an outcome. Anyone can claim it. Hides your proof.	Proof-led headline (p.2)
Banner ≠ headline	Two different brands on one screen reads as unfinished.	Match banner to headline
#OpenToWork frame	Signals "seeking a job" to clients who wanted to hire a specialist.	Switch to *Providing services*
About opens with employer	The first three lines are the most valuable space on the page, spent on a job description.	Outcome → proof → story
Only 3 featured items	Your strongest proof (InstalEase, SSL, MTK Edu, AlertPro) is invisible.	Add all 7 with live links
Diluted services	SEO and Android sit next to SaaS architecture and blur the position.	Keep 5 focused services
Wrong top skills	CRM and Python lead; neither is your differentiator.	Pin SaaS, Next.js, TypeScript
No recommendations	The strongest trust signal for hiring is missing entirely.	Request 3 this week (p.7)
No portfolio button	Visitors must hunt for proof. Most will not.	Custom button → portfolio

THE ONE-LINE GOAL

When someone opens your profile they should know, without scrolling: what you build, who you build it for, and where they can see it working.

02 Copy-paste rewrite

Name, headline, and About. Replace the text wholesale.

Name

Use **Muhammad Kashif** everywhere — it matches your portfolio, CV, GitHub and the name clients actually search. If you want to keep *Malik*, put it in the About section ("also known as Malik") rather than the display name.

Headline (220 characters)

OPTION A · RECOMMENDED FOR CLIENTS

Full-Stack SaaS Architect | I build multi-tenant platforms that ship revenue, not demos | 7 platforms, 3 live, 500+ tenants | Next.js · NestJS · AI

OPTION B · FOR HIRING MANAGERS

Full-Stack SaaS Architect & Founder @ MTK Codex | 7 production platforms (FinTech · AgriTech · EdTech · Sports) | Next.js · TypeScript · AI · CRM

RULES

Never write "passionate", "hardworking", "aspiring", or "looking for opportunities". One proof number, one stack, one niche.

About

PASTE INTO ABOUT

I build the software businesses actually run on — multi-tenant SaaS platforms, AI-assisted CRM systems, and cross-platform apps.

Seven platforms shipped. Three live in production. 500+ tenants and 50K+ animals tracked. I own the whole stack: PostgreSQL schema → API → UI → payments → CI/CD → handover docs.

Most freelancers hand you a landing page. I hand you a system your team can operate without me.

What I do:
• Multi-tenant SaaS — PostgreSQL RLS, Clerk Organizations, subdomain isolation
• AI that survives production — GPT workflows, TensorFlow.js on-device ML, guardrails, cost caps, kill switches
• Cross-platform delivery — Next.js web, React Native mobile, Electron desktop
• Revenue plumbing — Stripe, RevenueCat, JazzCash, EasyPaisa, subscriptions and feature gating
• CRM and internal tools — the unglamorous systems that remove manual work

Selected proof:
• InstalEase — installment-management SaaS with 6-tier RBAC and RLS isolation
• MTK Dairy — 500+ farms, 50K+ animals, IoT milking-machine feeds, bilingual Urdu/English
• Shakir Super League — live white-label cricket SaaS with 5-language AI commentary and WebRTC streaming (cricketleague.tech)
• MTK Edu — 90+ APIs, biometric attendance, offline-first teacher app
• LaraibCreative — live luxury fashion store with custom measurements and local payments

Currently a Full Stack Engineer at Pastry Marketing Agency, building an AI-assisted Smart CRM and client portal — while running MTK Codex for selected freelance engagements.

If you are building a SaaS, replacing spreadsheets with a real system, or adding AI without the bill shock, message me. I reply within 12 hours.

Portfolio: https://pf.mtkcodex.site

WHY THIS ORDER

Outcome first, proof second, scope third, personality fourth, call to action last. LinkedIn shows roughly three lines before *see more* — those three lines are the pitch.

03 Experience & skills

Make every bullet prove ownership, then fix what recruiters see first.

Full Stack Engineer — Pastry Marketing Agency Aug 2026 – Present

DESCRIPTION

• Build and maintain the agency's Smart CRM and client portal with Next.js, TypeScript, React and PostgreSQL
• Ship AI-driven automation that removes manual steps from client onboarding, reporting and follow-up
• Own features end to end — schema, API, UI and deployment — and turn non-technical requests into scoped releases
• Work directly with account managers and leadership to prioritise the roadmap

Full-Stack SaaS Architect & Founder — MTK Codex Jan 2024 – Present

DESCRIPTION

• Founded and lead a studio shipping multi-tenant SaaS for clients in Pakistan and internationally
• Shipped 7 production platforms across FinTech, AgriTech, EdTech, SportsTech, e-commerce, AI security and desktop
• 3 platforms live in production serving 500+ tenants and 50K+ tracked entities on a 99.9% uptime target
• Architected tenant isolation with PostgreSQL RLS, Clerk Organizations and stancl/tenancy — zero cross-tenant leaks
• Delivered 200+ API endpoints and shipped OpenAI GPT, TensorFlow.js on-device ML and Vercel AI SDK features
• Integrated Stripe, RevenueCat and local gateways (JazzCash, EasyPaisa, XPay) with subscription billing

Frontend & Full-Stack Developer — Freelance Jun 2022 – Dec 2023

DESCRIPTION

- Delivered 10+ client projects — e-commerce, dashboards and landing pages — on schedule
- Built the LaraibCreative luxury fashion store with JWT auth, Cloudinary media and local payments
- Migrated the stack to Next.js, TypeScript and Tailwind CSS, cutting page load times by roughly 60%
- Established the component and design-system patterns reused across every later project

Skills — pin these three first

Pin (top 3 shown by default):

1. SaaS Development
2. Next.js
3. TypeScript

Then add, in this order:

React · React Native · NestJS · Laravel · Node.js · PostgreSQL · Supabase · Multi-Tenant Architecture · Row Level Security · REST APIs · WebSockets · AI Integration · OpenAI API · TensorFlow.js · Tailwind CSS · Electron · Docker · Stripe · Payment Integration · CI/CD · System Architecture

REMOVE

Generic entries like Microsoft Office or Customer Service. They drag the average down and say nothing about what you build.

04 Adding live links

The exact click paths. This is the part most people get wrong.

LinkedIn only makes links clickable in **specific places**. A URL typed into your About section is plain text — it looks like a link, but nobody can tap it. So the strategy is: put your proof where LinkedIn allows clicking, and stop relying on the places it does not.

WHERE	CLICKABLE?	USE IT FOR
Featured section	YES	All 7 projects, with thumbnails
Contact info → Website	YES	Portfolio, company site, GitHub
Custom profile button	YES	"Visit portfolio" next to Connect
Posts, comments, articles	YES	Build logs and case studies
About section text	NO	Leave URL for copy-paste only
Experience descriptions	NO	Describe the outcome, not the link
Headline	NO	Message only — no URLs

4.1 · Add the seven Featured links

1. Open your profile and scroll to the **Featured** section.
2. Click the **+** (or the pencil, then **+**). A menu appears.
3. Choose **Add a link**.
4. Paste the URL from the table on the next page. LinkedIn fetches a preview.
5. Replace the auto-generated title with the custom title from the table — this is what people read.
6. Click **Add media** → upload the matching PNG from your `linkedin-assets` folder.
7. Save. Repeat for each project, **strongest first** — Featured displays in the order you add them.

> **WHY THUMBNAILS MATTER**
>
> A Featured card with a real screenshot gets scanned as proof. A bare URL card gets ignored as spam. All four images are already cropped to 1200 × 630 and named in the order to upload them.

4.2 · Set the custom button

1. Open your profile and click the pencil / **Edit profile**.
2. Find the **custom button** area near the top, beside Connect and Message.
3. Choose the label **Visit portfolio** (or *Visit website* if that option appears instead).
4. Paste `https://pf.mtkcodex.site` and save.

4.3 · Add links to Contact info

1. On your profile, open **Contact info** (under the intro, or via *More*).
2. Click the pencil and choose **Website** → **Add website**.
3. Set the label to *Portfolio* and the URL to `https://pf.mtkcodex.site`.
4. Add a second entry labelled *GitHub* → `https://github.com/Kaashmalik`.
5. Confirm your email and phone (WhatsApp) are present, then save.

4.4 · If a link will not attach

- **No preview appears** — your site is blocking LinkedIn's crawler. Add the link anyway, then upload the thumbnail manually.
- **"URL not valid"** — missing `https://`, a trailing space, or a local file path. Paste the exact URL from page 5.
- **Wrong image on the card** — LinkedIn cached the page's default social image. Remove the item, re-add it, upload media instead.
- **Cannot feature someone else's post** — by design. Only your own posts, articles and links can be featured.
- **Cards appear out of order** — Featured follows the order you added them. Remove and re-add to reorder.

05 The link list

Copy these exactly. All were verified returning HTTP 200 on 8 Nov 2026.

ORDER & TITLE TO USE	URL	THUMBNAIL
1 · Muhammad Kashif — 7 SaaS platforms, 3 live in production	https://pf.mtkcodex.site	01-portfolio.png
2 · MTK Dairy — 500+ farms, 50K+ animals, live AgriTech SaaS	https://dairy.mtkcodex.site	02-mtk-dairy.png
3 · LaraibCreative — live luxury e-commerce store	https://www.laraibcreative.studio	03-laraibcreative.png
4 · Shakir Super League — live white-label cricket SaaS	https://www.cricketleague.tech	04-shakir-super-league.png
5 · InstalEase — FinTech SaaS case study	https://pf.mtkcodex.site/projects/instalease/	Screenshot or default
6 · MTK Edu — EdTech SaaS, 90+ APIs, offline-first	https://pf.mtkcodex.site/projects/mtk-edu/	Screenshot or default
7 · MTK AlertPro — on-device AI security app	https://github.com/Kaashmalik/mtk-alert-pro	Repo social preview

FREE CV DOWNLOAD

Your CV is live at **pf.mtkcodex.site/documents/Muhammad-Kashif-CV.pdf** — add it as an eighth Featured item labelled *"My CV — full-stack SaaS architect"* so nobody has to ask you for it.

Services — choose five, drop the rest

Go to `Open to` → **Providing services**, then select:

1. SaaS Development
2. Web Development
3. Mobile Application Development
4. AI Integration & Automation
5. Technical Architecture Consulting

Remove **SEO** and **Android Development**. Neither is a lie, but both pull the profile back toward "generalist freelancer" and away from "the person who builds the platform".

TURN OFF THE GREEN FRAME

Remove **#OpenToWork**. Replace it with *Providing services* plus the *Hire me* button. Same reachability, better positioning.

06 Recommendations & content

Trust, then proof. This is what turns a profile into inbound work.

Request three recommendations this week

You currently show none. For freelance and contract hiring this is the single highest-leverage fix on the page. Send this to the InstalEase owner, the Shakir Super League organiser, and the MTK Edu administrator:

> MESSAGE TEMPLATE
>
> Hi [Name] — I'm updating my LinkedIn with the work we shipped together and I'd be grateful for a short recommendation. If it helps, here's a draft you can edit:
>
> "Kashif built our [platform] end to end — [one specific thing he solved]. He shipped on schedule, communicated clearly, and the system has run reliably since launch. I'd hire him again."
>
> No pressure if you're busy — even two sentences helps. Thank you!

Then **recommend them back**. Reciprocity roughly doubles the response rate. Ask the same three for a two-line testimonial with name, role, company and LinkedIn URL for the portfolio — anonymous quotes are worth very little.

A four-post rotation that generates inbound

Post one to two times a week. Proof beats motivation every time.

SLOT	FORMAT	HOOK
Build log	What shipped + the hard part	"Shipped this week: [feature]. The hard part was not the UI — it was [problem]."
Teardown	One technical lesson	"Most multi-tenant SaaS apps leak data in one place: [place]. Here's the checklist."
Client outcome	Before → after, with a number	"[Client] ran [process] in spreadsheets. Now [number] farms use it daily."
Soft CTA	Availability + process	"I have room for one more build this month. Here's how I scope it: 1… 2… 3…"

POSTING MECHANICS

Only the first two lines show before *see more* — make them the hook. Keep external links out of the post body (LinkedIn suppresses reach); put them in the first comment. Reply to every comment within the first hour.

07 Do-it-now checklist

In order. The whole list takes about ninety minutes.

Identity

- [ ] Rename to **Muhammad Kashif** (or commit to Malik everywhere)
- [ ] Replace the headline with Option A or B
- [ ] Update the banner to match the headline — 1584 × 396 px
- [ ] Rewrite the About section from page 2

Proof

- [ ] Add all 7 Featured links, strongest first
- [ ] Upload the four thumbnails from `linkedin-assets`
- [ ] Add the CV as an eighth Featured item
- [ ] Set the custom button to **Visit portfolio** → pf.mtkcodex.site
- [ ] Add Portfolio and GitHub under Contact info

Positioning

- [ ] Rewrite all three roles with the numbered bullets
- [ ] Pin SaaS Development, Next.js, TypeScript
- [ ] Add the full skill list; remove generic skills
- [ ] Reduce Services to the five focused ones
- [ ] Remove the #OpenToWork frame; switch to Providing services
- [ ] Turn on Creator mode only if you will actually post weekly

Momentum

- [ ] Request 3 recommendations using the template
- [ ] Recommend those 3 people back
- [ ] Publish one build-log post
- [ ] Ask for 3 attributable testimonials for the portfolio

Contact block — keep consistent everywhere

REPEAT THIS LINE EVERYWHERE

"I build multi-tenant SaaS platforms that businesses run on — 7 shipped, 3 live, 500+ tenants." Headline, About, banner, portfolio hero, GitHub bio, email signature. Repetition is what makes a personal brand stick.
