### PROFESSIONAL SUMMARY

Full-stack SaaS architect with 4+ years of experience shipping production, multi-tenant platforms across web, mobile and desktop. Seven platforms shipped and three live in production, serving 500+ tenants and tracking 50K+ business entities. Currently building an AI-assisted Smart CRM and client portal at Pastry Marketing Agency. Owns the full stack — database schema, APIs, UI, payments, CI/CD and deployment — and ships with monitoring and documentation instead of demos.

### EXPERIENCE

**Full Stack Engineer** Aug 2026 — Present
Pastry Marketing Agency · Lahore, PK (Remote)

- Build and maintain the agency's Smart CRM and client portal with Next.js, TypeScript, React, PostgreSQL and Python services.
- Ship AI-driven automation that removes manual steps from client onboarding, reporting and follow-up workflows.
- Own features end to end — schema, API, UI and deployment — and turn non-technical requests into scoped releases.

**Full-Stack SaaS Architect & Founder** Jan 2024 — Present
MTK Codex · Lahore, PK (Remote)

- Founded and lead a software studio shipping multi-tenant SaaS for clients across Pakistan and internationally.
- Shipped seven production platforms across FinTech, AgriTech, EdTech, SportsTech, e-commerce, AI security and desktop.
- Three platforms live in production serving 500+ tenants and 50K+ tracked entities on a 99.9% uptime target.
- Architected tenant isolation with PostgreSQL RLS, Clerk Organizations and stancl/tenancy — zero cross-tenant leaks.
- Delivered 200+ API endpoints and integrated OpenAI GPT, TensorFlow.js on-device ML and the Vercel AI SDK.
- Implemented Stripe, RevenueCat and local gateways (JazzCash, EasyPaisa, XPay) with subscription billing.

**Frontend & Full-Stack Developer** Jun 2022 — Dec 2023
Freelance · Remote

- Delivered 10+ client projects — e-commerce stores, dashboards and landing pages — on schedule.
- Built the LaraibCreative luxury fashion store with JWT auth, Cloudinary media and local payment support.
- Migrated the stack to Next.js, TypeScript and Tailwind CSS, cutting page load times by roughly 60%.
